

IDC Connector Epoxy Samples

573 Route 30, Imperial, Pennsylvania

Tel: 724-695-2829

e-mail: support@cs-technologies.com
web page: www.cs-technologies.com

Making your work easy

Step 1 - cut the wires

Step 2 - stick the samples to the tape.

Step 3 - stick the tubes to the tape. 1/2", 3/4" and 1" ID tubes are available.

Step 4 - Fill the tubes with epoxy

Step 5 - Wait 30 minutes for the epoxy to harden

Step 6 - Mount the sample in a holder.

Step 7 - Mill to the surface of the IDC contacts with FC 4001 cutting & milling machine

Step 8 - Polish with GT350

Step 9 - Place the sample under the microscope for etching and picture taking
